ICT SKILLS FOR ALL

## TAACTIC NEWSLETTER N°2

### A QUICK REMINDER ABOUT TAACTIC PROJECT

“Digital is our future. Whether in the field of the economy, employment or education, digital technology is an essential factor in the evolution, progress and sustainability of our society”\*.

In a world that is constantly evolving and tending towards the digitalisation of society and businesses, digital dropout also accentuates social exclusion, sidelining a certain number of people, both in terms of employability and in everyday's life.

Even if the current trend is to provide more and more support to the so-called vulnerable groups, training in basic digital skills remains underdeveloped in Europe.

TAACTIC project aims to set up innovative and inclusive training courses for these groups in order to equip them with basic digital skills to better understand and evolve in the world around us.

TAACTIC reconciles e-inclusion with sustainable employment prospects.

### WHAT IS THE STATUS OF TAACTIC PROJECT?

#### Intellectual output #1 (IO1): Creation of the digital skills assessment

Intellectual output 1 has been finalised and is available in each language of the partnership (English, French, Italian, and Spanish) at the following link: [Here](#)

#### Intellectual output #2 (IO2): Creation of the common frame of reference for digital skills training

Intellectual output 2 is also ready with the Common Framework of Basic Digital Skills and learning units. These two deliverables are available at the following link: [Here](#)

### SOME NEWS ABOUT THE PROJECT?

Due to various constraints on transnational travel related to the COVID-19 health crisis, physical meetings of the consortium could not take place during 2020 and the first half of 2021.

Thus, after having met physically in Brussels in November 2019, the transnational meetings in October 2020, February 2021 and June 2021 were held virtually.

The transnational meeting in October 2021 (France) was an hybrid one : some partners managed to attend physically whereas some others did it online.

Between these transnational meetings, 13 virtual meetings were held, on average one per month, in order to provide regular updates on work progress.

Erasmus+ Programme  
of the European Union

## WHAT'S NEXT?

- Finalisation and publication of innovative learning activities (IO3)
- Elaboration of recommendations report based on feedback from professionals and training organisations (IO4)
- Launching activity related to collection of innovative learning resources for IO5
- Participation in the transnational online meeting in January 2022
- Organisation of partner dissemination events from February 2022 onwards

## THE PROJECT PARTNERS

In collaboration with  
GRETA du Val D'Oise

## Intellectual output #3 (IO3): Educational activities

The work on intellectual output 3 is currently being finalised. The partnership first collected innovative educational resources related to basic digital skills. On the basis of this collection, they developed teaching resources for the development of basic digital skills.

The educational resources were then tested by a panel of learners and trainers. The partnership is currently working on finetuning the content. All the teaching resources will soon be available online on TAACTIC platform: <https://taactic.eu>.

## Intellectual output #4 (IO4): Recommendations report for training in digital occupations.

Within the framework of this intellectual output, TAACTIC project partners determined the occupations considered to be job opportunities for the project target audience, including IT support and information systems sector, IT programming and development, communication, user interface and digital creation, expertise and consulting, infrastructure, network and telecommunications, and finally the use of collaborative tools in companies.

For each identified occupation, a questionnaire was completed by professionals and trainers in order to point the technical and soft skills required to undertake these occupations. This work was initiated in November 2021 and is still in process.

This output will be materialised in the form of recommendations report to bring low-skilled people into digital occupations, occupations of the future offering opportunities.

## Intellectual output #5 (IO5): Educational resources for digital occupations

Work will start at the beginning of 2022. This intellectual output consists of collecting innovative educational resources in terms of training for digital professions, allowing professionals and any interested stakeholder to find sources and ideas to engage in a process of redeployment of training courses.
